Subject: RE: moldy military housing and retaliation for exposing the fraud.

Dear Spencer,

Thank you for taking my call and agreeing to meet with me on March 22nd at 11am in Senator Harris's DC office. My contact phone number is 760-822-8026.

To reiterate our brief conversation, it really is Senators Harris and Feinstein who are the most capable of shutting down the military housing mold problem and the retaliation that occurs when people expose it.

This fact may be a bit embarrassing for them because I have been asking Senator Feinstein for help to shut down the underlying fraud which causes it since 2005; and Senator Harris for help to shut down the criminal retaliation behind it in the State of CA since 2011. Unfortunately, CA Atty Gen Becerra is following Senator Harris' footsteps. (See video toward the bottom of this email titled "The Toxic Judgment". Fast forward to about an hour and a half in)

They said to contact your senator if you have information of the retaliation that is occurring when one speaks out of the fraud which harms the military families. I desperately need Senator Harris's help to stop the relentless retaliation I experience for exposing HOW the NGO military housing landlords are able to get away with denying liability for causation of disabilities and deaths from the moldy military housing. It is the same fraud that is used to deny liability in all U.S. moldy housing and work environments....

The short answer of why the problem persists is: because CDC NIOSH was instrumental in marketing naysaying junk science to physicians beginning in 2002. It was penned by toxicologists/expert defense witnesses, including a then newly retired NIOSH deputy director, Bryan Hardin. CDC ATSDR continues to fund the mass marketing of the junk science in physician educational materials. The GAO & Senate HELP let them continue to get away with it in 2008 via gutting the heart of a prior GAO audit of the health effects of MOLD.

The CDC-promoted-junk-science is the heart of the multi-purpose insurer fraud scam based on junk science, that the WSJ article exposes. It's a bogus risk assessment model that I call the Veritox Theory or the GlobalTox paper. It fraudulently professes to prove that

mycotoxins in water damaged buildings can never plausibly reach a level to harm anyone. It's used against tenants, home buyers, private sector & government workers, in schools and any place where people are being harmed by MOLD – yet are being deemed liars for saying they are so sick and can get no help from mainstream physicians or the building stakeholders.

THE USDOJ WILL NOT STOP THE CRIME OF THE MATTER..

After going around and round with the USDOJ for over a year, they basically told me to buzz-off. At the time, I was working the issue from the other side of the elephant in 2015 -- the ongoing corruption in the California courts that also causes the fraud to continue nationwide. The USDOJ refused to prosecute their own expert defense witnesses, California judges & justices, et.al. for case-fixing together and framing me for libel to defraud the public with the junk science that I exposed in 2005.

Quid pro quo, the USDOJ then turned around and hired Veritox as expert witnesses again in mid 2016.

I AM A RETALIATED AGAINST WHISTLEBLOWER via corruption in the San Diego courts.

I'm the original whistleblower (2005) of how the junk science of Veritox, Inc. (formerly GlobalTox, Inc.) was mass marketed into policies beginning in 2002. In a little internet writing, I wrote of how the fraud could be defeated in court by making the president of Veritox, Bruce Kelman, talk about the exchange of money among the players who were marketing the scam, in front of the eyes of jurors.

Another aspect of gross miscalculation on my part, I greatly under estimated how compromised the California courts are and thought they would protect me for telling the truth in America. Wrong! ...

The California courts keep trying to gag me and pummel me into silence from telling of what the CA judges and justices, along with their clerks and Veritox's attorneys have done that is literally criminal to keep the epic scam going. **It's a living nightmare to know that what they criminally do to me under the color of law, is continuing to devastate the lives of thousands.**

I think they are not even remotely concerned that they will be held accountable. So they just keep traveling further down the criminal rabbit hatch while dragging me along with them -- because they can't stop framing me (with fraudulent court documents and falsified electronic records) without exposing that they have been framing me and they know they've harmed thousands by doing so. **WHY THE 3 "NON-PROFIT" MEDICAL ASSOCIATION PAPERS DIRELY NEED TO BE RETRACTED ...**

Hello Ms. Kramer,

Thank you again for calling our office. I very much look forward to our meeting. The information you shared from Doctors Shoemaker and McMahon is very helpful and I'm reading it with great interest. Please let me know if you have any trouble arriving (we've had a more snowy winter than usual) and let me know if you have any other information you'd like to share in the meantime.

Thank you,
Spencer

Subject: Please relay my fear to Senator Harris that I'm going to be hurt again in CA for making this trip to DC

Dear Spencer,

It was very nice meeting you yesterday. Thank you for taking the time to understand why the military families are unable to obtain help for their disabling illnesses caused by the moldy military housing; and why I am afraid of my home state's courts for refusing silence of the University of California's key role is causing the discrimination of the families to continue nationwide.

Please relay the information that I provided to you to Senator Harris. It makes me feel safer knowing people in power are watching. I will be in touch when the letter that we hope U.S. senators will sign on to (to shut down the deadly scam of the military housing landlords, their insurers and their medical "experts") is ready.

See below. Health Impact News is writing of how the deadly scam continues by the ongoing case fixing in the San Diego courts; and how they will not stop framing me for libel and literally terrorizing me with a void judgment on behalf of the owners of Veritox, Inc. (the creators of the bogus toxicological risk model that the entire naysaying scam which is greatly harming our military families, is founded upon -- and the UC name is used to give it legitimacy).

WR,
Sharon

Hello Sharon,

Thank you for taking the time to meet with me as well. Please do keep in touch and let me know of your work.

Best,
Spencer
